

About the company

Gas is a growth market worldwide. We are already a member of a significant international player. With an outstanding track record, a strong financial position and ambitious growth targets, our future is extremely exciting.

BG Group is the largest producer of gas in Tunisia, supplying approximately 50% of the domestic gas demand from the Miskar field. In addition, BG Group holds two exploration permits in the Gulf of Gabes with a combined surface area of 4 088 sq km.

BG Group intends to undertake further exploration activity in Tunisia and to seek further investment opportunities utilizing its gas chain expertise.

BG Group submitted a Hasdrubal plan of development which was approved by the Tunisian government in June 2006. Progress with the development has been made, and all major contracts have been awarded. First gas from this joint project (ETAP, BG 50/50) is planned for the first half of 2009. Hasdrubal is a \$1.2 billion project and once production commences, BG will be the largest producer of gas, LPG and liquids in Tunisia.

Message to visitors

Many companies go on about fantastic opportunities, but here's one that knows what it's talking about; Natural gas. The fastest growing energy market in the world today. It's exciting. It's challenging. It's inspiring. Which is why there's never been a better time to join BG Group.

We possess core skills in every aspect of the gas chain from the reservoir to the burner tip. Our business is the discovery, extraction, transmission, distribution and supply of natural gas to existing and developing markets around the world. Our core skills include exploration and production, transmission, through pipeline systems or LNG liquefaction and transport, as well as the creation and distribution of energy through gas fired power generation.

Drive and ambition are two key qualities you'll need. There are a whole host of opportunities available to you at BG Group, and to make the most of them you must be someone who's always keen to learn, and wants to gain as wide an experience as possible.
